DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 50-51 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 50 recites the limitation "adding at least one metal salt or complex" in step (a). This limitation renders the claim indefinite because it is not clear to which metal the claims is referring, i.e. catalytic metal, divalent metal or trivalent metal. It is suggested that applicant define the metal in the preamble as a catalytic metal and then refer to it as such in step (a).

4. Claim 50 further recites the parenthetical expression "at least partly." This limitation renders the claim indefinite because it is not clear if this expression is required or not, rendering the scope of the claim unclear. It is also not clear if applicant intends to claim that the carrier is in or is partly in and then transformed into a hydrotalcite material. Is only partly in the hydrotalcite sufficient to meet the carrier claimed?
